

# PROTECTING WHAT MATTERS MOST FOR OVER 55 YEARS

You have an important decision to make. Your first step? Choose the right supplier!

Vicon offers a true end-to-end security solution with established integration partners, innovative technology, knowledgeable 24/7 customer support, and scores of delighted, long-term, repeat customers. Since 1967 companies and businesses of all sizes have placed their trust in Vicon's security solutions. Our global customer base is over 400 thousand strong and spans a diverse array of industries, from the smallest franchisees, to enterprise Fortune 500 companies, to complex campus environments.

## What Sets Vicon Apart?

### Single-Source Supplier

We deliver your complete end-to-end solution—both cloud-based and on-prem—including VMS, access, cameras, and AI...simplifying purchasing and support.

### Lower Total Cost of Ownership

No surprise fees, additional support charges, or forced upgrades. With Vicon, you'll save >50% of what you would pay with most other solutions on the market.

### Open Platform

Our solutions work with other VMS platforms, cameras, and hardware, giving you flexibility to mix and match the various elements of your physical security infrastructure.

### Free U.S.-Based Tech Support

You can reach out to Vicon's tech support 24/7, with the fastest resolution time in the industry. And our Field Sales Engineers will work with you to ensure the best possible solution.

### Unified Solution

You can monitor and track your security operations—including video, access, alarms, intercom, and even 3rd party integrations—from a single UI. No swivel chair monitoring!

Leveraging the investment your company has made in security, surveillance, and facilities management can be an intimidating undertaking. Choosing the right tools to help you integrate, deploy, and manage those resources is your critical first step. **Choose Vicon.**

# NEXT

## THE SMARTEST CAMERA IN THE ROOM

With one of the smallest footprints in the industry, NEXT is bundled with intelligent features that render it more than just a camera—it's a self-contained solution with an advanced onboard communication system.

◆ milestone AVIGILON Genetec Exacq n<sup>x</sup> Network Optix ONVIF

### Here's Why NEXT is Quickly Becoming the MVP of Physical Security

#### Real-Time Auto-Tuning

AI Vision does all the fine tuning automatically, constantly optimizing the camera for its environment.

#### Real-Time Analytics

Real-time intel lets you proactively detect and prevent incidents before they become critical situations.

#### See Colors in the Dark

Quickly detect incidents and identify suspects—always in color—even in near-dark conditions.

#### Customizable Signal Lightbars

The camera's lightbars can communicate situational awareness status, e.g., flashing red for warning.

#### Leverage Color-Based Analytics

Perform searches based on vehicle or clothing color, even at night, when most cameras switch to B&W.

#### Powerful Microphones

Two powerful microphones let you hear what's going on within 50 feet in any direction of the sensor.

#### Say Goodbye to IR

Eliminate the inconveniences that come with IR, like lens spotting and unusable video in the rain.

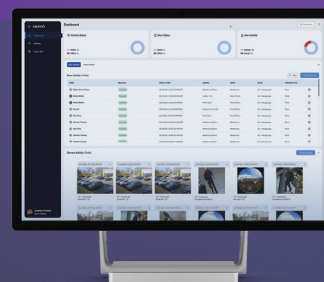

#### Commercial-Grade Speakers

Customized messages can be automatically triggered 360°, PLUS you can perform live direct talk-down.

### Will These Features Work With My VMS?

Yes! NEXT is certified for compatibility with the industry's leading VMS platforms, allowing you to leverage all of these innovative features without having to rip and replace your existing systems and infrastructure.
